

**Thank you for offering to Test this Magno flo fuel saver unit.**

**Below are the instructions of what is required:**

Do you know what your fuel consumption is for your vehicle? – You need to know accurately not just a “rough idea” of how many miles to the gallon/ litre you get.

If the answer is YES please follow the instructions in section B.

If the answer is NO then please follow the instructions in Section A

### **Section A**

- Firstly fill your vehicle with fuel, set the vehicle’s odometer to zero
- When you next fill the vehicle take a note of the quantity of fuel added, and a note of the mileage on the vehicle odometer. Write the number of miles onto the fuel receipt and use the calculation below to calculate miles to gallon.
- Take the number of litres and divide by 4.55 to convert litres into gallons
- Take the number of miles and divide this by the number of gallons
- This will give you your miles / gallon add this to the appropriate box on the reverse of this document.
- E.g. 60 litres and 400 miles  
 $60 \text{ divided by } 4.55 = 13.19 \text{ gallons}$   
 $400 \text{ divided by } 13.19 = 30.33 \text{ miles to gallon}$

### **Section B**

- The Magno-flo unit needs to be fitted to the fuel line of the engine – please contact your distributor and ask them to fit the unit to your vehicle.
- Then follow the instructions in Section A.
- Repeat Section A up to three times.

### **Section C**

- **Sign this agreement to agree to participate in this trial**
- Your supplier will call you a minimum of once a week to discuss how the trial is running
- The trial will run for a maximum of four weeks
- You must provide the supplier with the results of the trial
- At the end of the trial you have two options
  - purchase the unit at RRP of £69.95
  - return the unit
- Complete the testimonial section on the reverse of this document
- **Return this completed document to your supplier at the end of the trial.**
